The NMI is an application-oriented research institute that makes scientific knowledge available to the business world.

- Application-oriented research and development, consultation, measurements, testing, analysis, studies and implementation of innovative solutions.
- Wide, efficient service spectrum for SMEs and large customers.
- Flexible structures, highly qualified, interdisciplinary teams, state-of-the-art equipment and quality management for extraordinary results.
- Realisation of goal-oriented projects with a strong network of industrial partners, universities and research institutes with various specializations, especially the life sciences.
- Incubator for new companies.
- Founded in 1985 as a non-profit foundation.
- 190 employees.

With our focus on solution-oriented, applied research and development, we achieve concrete results quickly and efficiently. Convince yourselves of our wide, interdisciplinary competence in meeting your demands.

NMI achieving results.

Improvement of adhesion >>

for coatings for bonding

NMI Natural and Medical Sciences Institute at the University of Tübingen
Markwiesenstraße 55
72770 Reutlingen
Germany

Adhesion optimization
- Abrasive blasting (corundum, glass beads, quartz sand, etc.)
- SACO/ROCATEC (silanized blasting abrasive)
- Flame treatment (Pyrosil)
- Corona
- Atmospheric pressure and low-pressure plasma
- Laser

Durability testing
- Environmental cycle test (e.g. VW PV 1200)
- Cyclic corrosion test (VDA-621-415)
- Immersion test
- Cleaning/disinfection and sterilisation

Strength testing
- Miniaturized rapid test for adhesion testing of thin layers (pull-out tension)
- Tension test (pull-off; DIN EN ISO 4624 and ASTM F1147)
- Tensile test (DIN EN ISO 527)
- Tensile lap shear test (DIN EN 1465)
- Peel tests (DIN EN 1464, DIN EN ISO 11339)
- Cross-cut test (ISO 2409)
- Helium leak test (DIN EN 1779)
